

February 7, 2022

The Honorable Michael S. Regan
Administrator
Environmental Protection Agency
1200 Pennsylvania Ave., N.W.
Washington, D.C. 20460

The Honorable Michael Connor
Assistant Secretary of the Army for Civil Works
U.S. Department of the Army
108 Army Pentagon
Washington, D.C. 20310

Docket ID: EPA-HQ-OW-2021-0602
Submitted via Regulations.gov

Dear Administrator Regan and Assistant Secretary Connor:

Livestock producers across the country faced years of regulatory uncertainty related to the definition of "Waters of the U.S." We rely on clean water for the health of our livestock, families, and local communities. However, the EPA must provide clear standards that support U.S. farmers, ranchers, and small businesses. We urge EPA to focus federal jurisdiction on traditionally navigable waters, their consistently flowing tributaries, and abutting wetlands. Attempts to expand federal jurisdiction to ephemeral and isolated water features remove focus from the waterbodies that most significantly contribute to downstream water quality. Further, long-held agricultural exclusions for farm ponds, grassed waterways, surface and subsurface drainage systems, groundwater, farm ditches, road ditches, canals, playas, stock ponds, prairie potholes, prior converted cropland, and other isolated features are vital to ensure that agricultural producers are not unnecessarily burdened. Thank you for listening to America's livestock producers.

Sincerely,

Don Schiefelbein
