

EMERGENCY RESPONSE FUNDRAISER FOR

HAWAI'I'S AGRICULTURE COMMUNITY

We need your help

Fueled by hurricane winds and drought conditions, catastrophic **wildfires** began on multiple islands in Hawai'i on August 8, 2023. The fires rapidly gained intensity leaving communities devastated throughout the state. Maui Island endured multiple uncontrolled fires leaving many homes, communities, businesses, and land devastated. Ranches and farms have also been burned. A few structures and piles of ash are what remains of historic Lāhainā town, and search and rescue efforts continue to find survivors.

We humbly ask you to share this announcement and if you have the means to consider donating to the agricultural producers in Hawai'i whose livelihoods have been threatened and whose lives will be forever altered from these tragic events.
